

Post-Mortem

CS135 Fall 2024, Assignment 04

Question 4 (pokerfun.rkt)

General

- Many students uncapitalized the data types for contracts;
- Many students are missing or wrote the incorrect contract requirements;
- Some students used `lst` or `list` instead of `(listof Card)`.
- Some students used `Boolean` instead of `Bool` in the contract.
- A few students used the data definition of `Card` instead of simply using `Card`.

Part (a):

- Many students did not require `(listof Card)` to be empty.

Part (c):

- Most students did not consider that the function could consume fewer than 5 cards in recursive calls.

Part (f):

- Some students had incorrect number of data types in the contract.
